

therma**core** 

THIRD EDITION

thermacore

Manufactured from GRP (Glass Reinforced Plastic), Thermacore Doors are compression moulded to give a high definition panel design with an authentic timber appearance which is unaffected by variations in temperature.

The stiles and rails are composed of a water-resistant polymer which are bonded to the skin and then filled with an insulating core of 100% CFC- free polyurethane.

The main benefits of the door are:

- > The door is 9 times more thermally efficient than a timber door
- > Manufactured from high impact-resistant materials to offer high levels of security
- > Hung into a fully reinforced 70mm profile outerframe
- > Standard glazing sizes and a range of stunning decorative glass available

Key to Decorative Glass

- TG** Triple Glazed Glass Unit
- DG** Double Glazed Glass Unit

Appearance

Your door must look good and be aesthetically pleasing.

Think about:

- > Door Style
- > Door Colour
- > Choice of Decorative Glass

Security

All important in protecting your home from unwanted visitors.

You need:

- > Impact resistant GRP with rigid polymer subframe
- > High-density polyurethane foam core
- > Proven to PAS24 Security standard, essential for achieving 'Secured by Design' endorsement*

Weatherproof

A must to keep the elements at bay! It must have:

- > A waterproof door leaf
- > A high performance, weather resistant, glazing system
- > Weather performance, proven to BS6375 - 1 Classification, for weather tightness, air, wind and water

Heat Insulation

Keeping your home insulated and your bills down. You require:

- > A high performance insulating core
- > High performance insulated glass units
- > A door that exceeds Approved Document L of the Building Regulation requirements

Sound Insulation

Protecting you from external noise. It must have:

- > Baffling against noise with a high-performance insulating core
- > At least Outdoor-Indoor Transmission Class (OITC): 26db
- > At least Sound Transmission Class (STC): 29db

Durable

A door with pedigree - tried and tested for over 20 years. It needs:

- > Strength from its construction
- > High impact resistant door skins
- > Stability, whatever the weather conditions

TRADITIONAL DOORS

PANELLED

The panelled door contains sophisticated and sleek mouldings along with a high-definition woodgrain finish to make an entrance door that stands out from the crowd.

LINEAR ETCH

Linear Etch Grain detailing brings a classic touch to our traditional styled slab. With its crafted woodgrain detail, each panel is book-matched for a seamless and stunning finish.

FARMHOUSE

The farmhouse door is an evolution of the traditional cottage style with defined framed grooves and stylish woodgrain finish to elevate this beautiful looking door.

DESIGNER DOORS

FLUSH GRAINED

An authentic woodgrain texture presented flush for a blank canvas or with highly defined mouldings for a traditional look.

MONZA II

A linear panel design and book-matched woodgrain detail. Totally unique and totally contemporary.

LINKS

Designed to match the smooth finish of aluminium. Unique, clean and totally customisable.

CASSETTE STYLES

STANDARD

The traditional choice with a moulded design and a woodgrain finish to suit a more conventional door design.

FLAT GRAINED

Be eclectic by combining a woodgrain finish with a modern squared-off flat profile that complements a contemporary Flush Grain or Designer Monza II door.

FLAT STIPPLE

The modern one, with a squared-off flat profile and smooth stippled finish that perfectly matches our aluminium-effect 'Links' composite door.

INOX STAINLESS STEEL

Inox Stainless Steel
A contemporary cassette option with a smooth stainless-steel finish, offering a modern and sophisticated look for your door.

Inox Black Stainless Steel
A bold cassette option with a matte black stainless-steel finish, offering a modern and unique look for your door.

I DOORSTYLES

Whether you are looking for high levels of light, a more secure environment, or replicating an existing door, we should have the style you need. Sidelights can also be used in combination with the doors illustrated and can be found on page 38.

PATTERNED GLASS OPTIONS

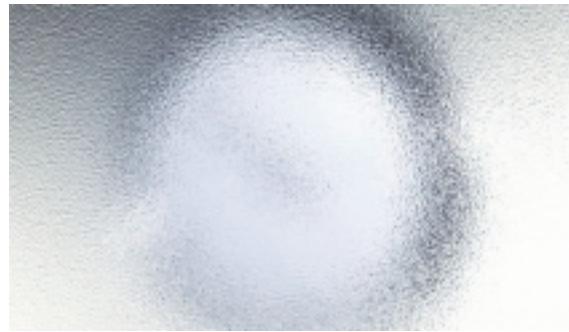

GLAZING

MINSTER

Minster pays homage to historic hammered glass and is most suited to period homes or more traditional door styles.

STIPPOLYTE

The timeless appeal of this stipple effect glass makes it one of our most popular options. The surface texture offers very high levels of obscurity and the design suits most door and house styles.

COTSWOLD

A more heavily textured pattern resembling water cascading over a surface. It is one of our most popular patterns and is especially suitable for doors that require higher levels of privacy.

SATIN

Satin glass is an acid etched glass that offers high levels of privacy. It is a very neutral finish similar to sandblast and is ideal for use in both traditional and contemporary doors.

I DOOR SIZING

Due to the number of PVC-u profiles available to produce our composite door, certain restrictions in size could apply. The sizes below are an estimation only of the typical range using a standard 70mm outer frame with a 50mm internal height and the definitive size range will be confirmed dependent on survey.

			Height with Standard Threshold and Cill	Height with Low Aluminium Threshold and Cill	Width all Door Styles (Except Muir)	Width Muir Door Style Only
	Single Door	Minimum	2040mm	2000mm	829mm	890mm
		Maximum	2150mm	2110mm	1025mm	1025mm
	Door with Single Composite Sidelight	Minimum	2040mm	2000mm	1302mm	1363mm
		Maximum	2150mm	2110mm	1713mm	1713mm
	Door with Single Glazed Sidelight	Minimum	2040mm	2000mm	1040mm	1101mm
		Maximum	2150mm	2110mm	2300mm	2300mm
	Door with Double Composite Sidelight	Minimum	2040mm	2000mm	1775mm	1836mm
		Maximum	2150mm	2110mm	2401mm	2401mm
	Door with Double Glazed Sidelight	Minimum	2040mm	2000mm	1249mm	1310mm
		Maximum	2150mm	2110mm	3600mm	3600mm

I CARE & MAINTENANCE

Your new door should keep safe and secure for years to come however with all products and especially those that are exposed to the elements we recommend that you carry out a care and maintenance routine.

- > Door frames should be washed with warm soapy water, however stubborn stains can be removed using specialist PVC-u cleaners and by following the manufacturers' guidelines.
- > The door leaf should only be cleaned using warm water or non-aggressive composite door wipes. No solvent-based product or abrasives should be used as these will damage the surface of the skin.
- > External glass should be cleaned with warm soapy water and cleaned with a proprietary glass cleaner.
- > Hardware can be cleaned with a mild detergent and wiped clean. No harsh chemicals or abrasives should be used.
- > Maintenance of the door may be required to maintain any guarantees from the installer. Hinges should be lubricated with engineering oil. Cylinders can be lubricated with Teflon-based products only, as other oils may cause degradation. If necessary, a small amount of lubricant can be applied to the moving parts such as letterplates, handles and knockers.

The background of the page is a complex, abstract geometric pattern. It features several overlapping diamond shapes (squares rotated 45 degrees) in various shades of gray, creating a sense of depth and layering. A prominent red triangle is visible on the left side, partially overlapping the gray diamonds. The overall aesthetic is clean, modern, and technical.

Due to the limitations in photographic and printing processes, actual colours and designs may vary from those illustrated in this brochure and should be used for guidance purposes only.
We reserve the right to alter specifications without prior notice.
